

ATERAS Demonstrates Natural Adabas Re-Host Solution at Gartner Symposium ITxpo

*Application Transparency Platform™
Provides a Low Cost Alternative to Natural Adabas Applications*

DALLAS, TX, October 17, 2011 – ATERAS, a leading provider of solutions for legacy migration and modernization, announced today the release of its Application Transparency Platform™ (ATP™). ATP is a Natural Language Re-Hosting solution that dramatically reduces the timeframe for moving legacy applications out of expensive licensing environments and updating databases to relational database technology, providing a fast ROI. ATP has been developed to work with all technologies -- IBM, Microsoft and Oracle. ATERAS will be demonstrating the revolutionary ATP technology at the Gartner Symposium ITxpo in Orlando, FL, October 17-20 in Booth 527.

Natural applications are moved seamlessly to the ATP runtime environment without disruption to the business teams. There is no need for end-user training and the development teams are productive on day one. The current Natural programmer teams continue to maintain the applications. The robust ATP environment provides full documentation of the Natural applications, impact analysis capabilities and an improved programming environment. The development environment is complete with version control, dual runtime mode, debugger and deployment tracking capabilities.

The Adabas databases and data are effortlessly transformed to a relational database technology of your choice using ATPconvert. The re-hosted Natural applications process against the new relational databases without modification using the ATP runtime called ATPaccess.

"ATP is a revolutionary solution for eliminating the high license fees of Natural Adabas without impacting the business, freeing companies of IT budget constraints. Natural applications are unchanged; mission critical business rules are left intact. The ROI is accelerated to months versus years." Scott Miller, CEO, President, ATERAS. .

ATP provides a complete Natural Adabas strategic solution for that is driven at your business pace. Once the expensive license fees are removed, enhancement projects can be planned, enabling you to modernize your applications at your own pace.

About ATERAS

ATERAS has supported global enterprises for over 28 years, offering state-of-the art services that exploit automation for transforming legacy applications and databases into modern technologies using patent-pending automated conversion and modernization technologies (DB-Shuttle™ & eav™ suite). ATERAS' Application Portfolio Management (APM) solutions and Application code understanding range from Assessments of existing IT environments, enterprise field expansion, and COBOL/Natural workbenches to automated documentation tools.
