

Company Fact Sheet

Solutions

ATERAS has supported global enterprises for over 25 years, offering state of the art tools and services to our clients for modernizing and migrating legacy systems to the most current IT environments. The patent-pending automated technologies include DB-Shuttle™ for conversion and eavRPM™ for rapid program modernization. Application Portfolio Management (APM) solutions range from comprehensive assessments of existing IT environments, enterprise field expansion, COBOL and Natural workbenches to automated documentation tools.

Migration of mission critical applications and databases can be either mainframe to mainframe or to newer platforms such as Java or the .Net framework. ATERAS delivers these solutions by working through leading systems integrators and alliance partners in markets including: Insurance, Financial Services, Healthcare, Government and Universities in both domestic and in global markets.

Markets

Market segments that benefit from ATERAS' services include:

- Insurance Companies
- Financial Services
- Healthcare
- Government Agencies
- Universities

Clients

A sample of ATERAS' prestigious clients includes:

- University of Miami
- Edward Jones
- Saks Fifth Avenue
- New York Life
- State of CA
- National Life of Vermont
- GE
- Gates Rubber Company

Offerings

ATERAS developed a 100% automated conversion process to migrate older applications and databases to current languages and database management systems, including mainframe-to-mainframe and mainframe to distributed platforms such as the .NET Framework. The conversion process ensures that code is

collected, analyzed, converted and delivered automatically using ATERAS' patent-pending conversion automation technology DB-Shuttle.

Alliances

ATERAS enters alliances with leading Systems Integrators and partners to broaden its capabilities and gain access to leading-edge technologies and solutions. Through these alliances the company and its strategic partners deliver even more comprehensive and innovative solutions for the demanding challenges of mainframe application migrations and conversions.

Partners

- Fujitsu
- IBM
- Microsoft
- Micro Focus
- Oracle
- Alchemy

History

ATERAS was founded as SBS and has had a long history in the conversion of IDMS, Adabas, IMS and VSAM databases and applications to SQL Server, DB2 and Oracle. The DB-Shuttle automation technology assesses and analyzes the mainframe environment and its applications; automatically converts the databases, applications, and languages. The end result is 100% equivalent functionality with 100% retention of business rules. The integrity and completeness of the converted data is easily maintainable n-tier architecture.
